### About LATAB

LAT elektronik AB (**L**ED **A**rray **T**echnology) was founded in 1988 in Stockholm, Sweden. Starting as a consultancy for image processing technology, the company soon became a specialist for customer-specific lighting solutions in the area of machine vision. As part of the German Polytec Organization ([www.polytec.com](http://www.polytec.com)), LATAB today offers an outstanding variety of standard products and is known for its high degree of flexibility and short delivery times, even for customer-specific developments.

### Why choose LATAB products?

- All products are “Made in Sweden” and satisfy the highest quality demands
- Individual requirements are largely met by the modularity of the standard program
- All lights are available in continuous and strobe modes
- Lights and controllers are easy and user-friendly to operate
- Very flexible solutions
- Very short delivery times
- Application-orientated advice and long-term service

### Support

Integration into the international Polytec Organization guarantees world-wide support for LATAB products. Experienced engineers from the machine vision industry help customers make the best choice of products and if required provide support in the integration of machine vision systems.

### Customer-specific engineering

Customer-specific developments and adaptations are a core part of LATAB’s business – at near standard prices of course, and with short project lead times. You name it, we’ll make it!

Design skills:

- CAD engineering
- Electronics development
- Thermal management

### Evaluation kits

Different environmental conditions for machine vision applications can often make the choice of suitable lighting difficult. That’s why in many cases “Try before you buy” is the way to go.

LATAB provides demonstration units of potentially suitable lighting heads and controllers to help the customer decide on the best lighting for his practical situation. Try it out!

### Warranty

A warranty period of one year applies to all light heads and controllers under the following operating conditions:

Operating temperature:

+5 °C to +40 °C (41 °F to +104 °F)

Storage temperature:

-40 °C to +90 °C (-40 °F to +194 °F)

Relative humidity:

max. 80%, non-condensing

Geographical height of operating location:

up to 2000 m above sea level

Pollution degree:

2, only non-conductive pollution occurs. Except that occasionally a temporary conductivity caused by condensation is to be expected.

Definition of a defect light head:

A light head is defect if the brightness decreases to 50% of the original luminosity.

Restriction of Warranty:

Operation without LATAB controller causes a loss of warranty!

### Changes

We reserve the right to make changes to products without notification.

## 産業用LED照明装置

### 照明装置のテクニック

#### Illumination

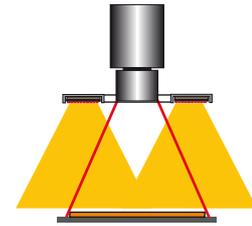

#### Application

#### Figure

##### Ring light

- Illuminate flat, diffused surfaces
- Inspection of circular objects
- When direct attachment to lens is required
- Standard sizes: 44 to 345 mm outer diameter
- Optional: diffusers and polarization filters

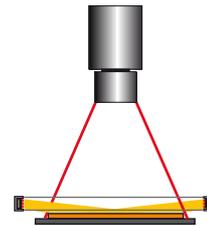

- Homogeneous/directed lighting
- Defects on surfaces
- OCR
- Print control
- Inspection of assembly
- Part recognition

##### Dark field light

- Creates low angle light and enhances contrast of surface features
- Standard sizes: 25 to 276 mm outer diameter
- Small working distance

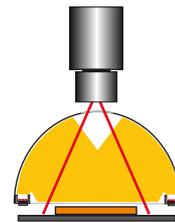

- Detection of edges, defects and contours

##### Dome light/tunnel light

- Diffused ("cloudy day") and shadow-free lighting
- Standard sizes dome: 44 to 345 mm outer diameter
- Standard sizes tunnel: 119 to 371 mm length
- Small working distance

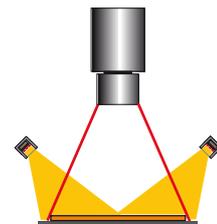

- Inspection of specular and diffuse objects
- OCR
- Print control
- Label inspection

##### Line light

- Can also be used as a dark field light to create low angle light
- Standard length: 50 to 446 mm
- Optional: diffusers
- One, two or square lines are available

- Homogeneous/directed lighting
- Defects on surfaces
- OCR
- Print control
- Inspection

# LATAB

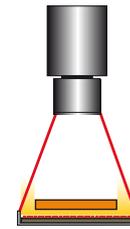

## 産業用LED照明装置

Illumination	Application	Figure
--------------	-------------	--------

**Back light**

- To highlight the contour of a flat object
- For opaque and transparent objects
- Ideal for precise measurements
- Standard sizes: 51 x 48 to 207 x 516 mm

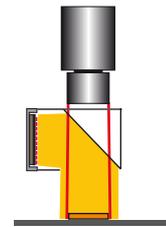

- Measure outside dimension of objects
- Locate parts or mounting holes
- Positioned under the object
- Homogeneous lighting

**Coaxial light**

- Diffused and shadow-free lighting
- Creates contrast between specular and diffuse surfaces
- Short working distance

- For reflecting objects
- Print control

## Adjustable light beam angles

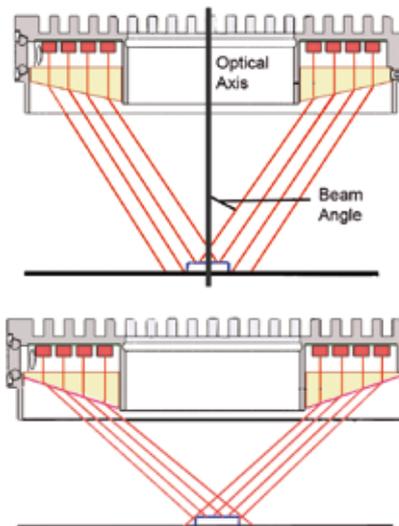

The ring lights and dark field lights manufactured by LATAB always have a diffuser in order to make the light beam even and homogeneous.

This gives the opportunity to change the light beam angle after the customers needs by adjusting the angle of the diffuser.

So individual beam angles can be taken into account on request.

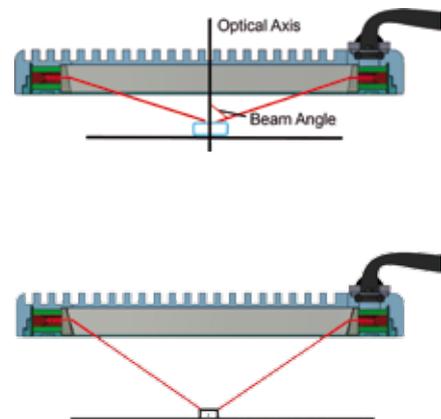

**Ring lights**

The standard angle is 12°. Custom adjustments from 0° to 40° on request.

**Dark field lights**

The standard angle is 80° (optical axis). Custom adjustments from 70° to 90° on request.

# LATAB

## 産業用LED照明装置

## LED照明ヘッド

LATAB LED lightings are devices that can be used for a great variety of vision and industrial applications, e.g. inspection, testing and robot control.

The LED lighting heads feature a superior light intensity and smooth lighting combined with long lifetime.

The LATAB product family is highly modular and can be used in various combinations to optimize the illumination.

All modules, light heads and controllers are made for industrial applications. For this reason they are built in solid aluminium housings.

Any type can be used either for continuous or strobe mode.

The lights are robust, small in size and easy to install. Just connect the light head to a controller and the light intensity will be at 100% by default.

### A wide product range

The modular design of LATAB LED lighting heads permits a range of more than 3,000 standard products.

Besides the design of the lighting head, the key selection criteria are continuous or strobe mode lighting, different LED colors and innumerable sizes, mounts and cable-configurations.

Accessories such as polarizing filters and brackets also form part of the product range.

The standard lighting heads are based upon high intensive LEDs, available in a wide range of types and sizes:

Ring-, dome-, tunnel-, front-, back-, spot-, line-, dark field-, coaxial-, rectangular and custom designed lighting heads.

They are available in different colors, RGB (red/green/blue) as well as IR and UV.

The standard colors are:

White

Red (617 nm)

- Infrared (880 nm)

• Blue (465 nm)

• Green (520 nm)

• RGB (red/green/blue)

• Ultraviolet (395 nm)

### Lighting head series

Today LATAB applies high intensive SMD type LEDs (surface mounted device). Lighting heads based on these LED type are named S-series ("S" as first character in the product code).

The well-established H-series lighting heads are based upon the classic hole mounted leds ("P" as first character in the product code). They were standard before the introduction of SMD type LEDs. The H-series is not listed in the catalog any more. These lighting heads are still available on request. The customer's investment protection is a key point in the long lasting partnership with LATAB customers.

### Guideline for longer lifetime of LED lighting heads

LEDs are long-life components; however the effect of heating will decrease their lifetime. To increase the lifetime, please keep the following in mind when choosing LED lighting:

- Red LEDs feature the longest lifetime
- Adjust light intensity to lowest usable level
- Keep ambient temperature low
- Controller mode for longer lifetime in this order:
  1. Strobe mode (strobe controller)
  2. Long flash mode (continuous mode controller)
  3. Continuous mode (continuous mode controller)

# LATAB

## 産業用LED照明装置

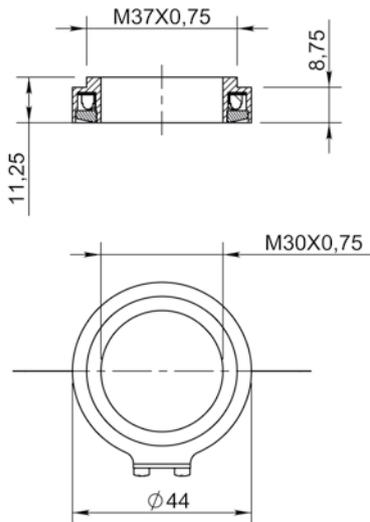

### スレッドレンズ 付きリング照明

- By a small bracket (order no. LAD3 7218)
- By a standard lens adapter with a lens thread of 37 x 0.75 mm. Various threads are available to fit different lenses

The best evenness of light will be achieved at a working distance of 20-25 mm. A diffuser is included.

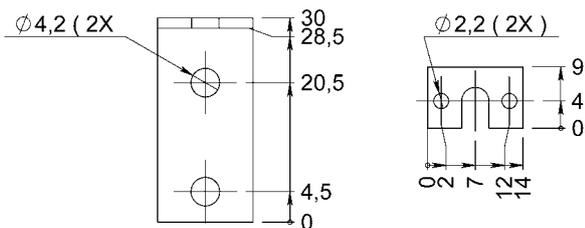

#### Mechanical dimensions

Step files available on request

#### Options

- Cable length and type see "Order options"
- Lens adapters for different lens threads on request
- Bracket LAD3 7218:

#### Order information

Order number	Sizes (mm)		Working distance (mm)	Controller <sup>1)</sup>

B	Blue	465 nm
G	Green	520 nm
U	UV	395 nm

<sup>2)</sup> Example for red ring light: SAH3 1044

# LATAB

## 産業用LED照明装置

### リング照明

Ring lights provide a uniform and shadow-free lighting. A diffuser (removable) for homogeneous light is included.

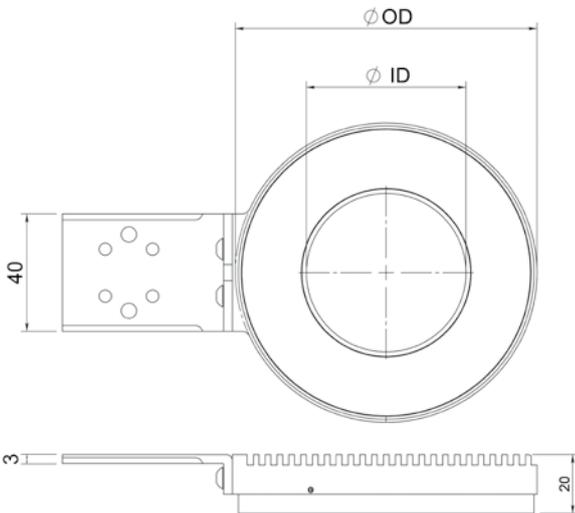

In order to avoid reflection, some ring lights can be used in combination with polarization filters.

Brackets are included (no. SXX3 010213, for details see lighting head brackets).

The standard light beam angle is 12°. Custom adjustment from 0° to 40° on request.

The special RGB lights are built with high-power three-chips LEDs red, green, and blue, enabling the use of each color separately or in combination. White light can be achieved by setting each channel to the same intensity level.

#### Mechanical dimensions

## 産業用LED照明装置

### 50° ライトビーム 角度付き照明

These ring lights are characterized by a 50 degree inward aligned light output which places them between conventional ring lights and dark field lights. This kind of illumination is used for example for shadow-free lighting of conic objects. Bracket is included (no. SXX3 010213, for details see lighting head brackets).

#### Mechanical dimensions

Step files available on request

# LATAB

## 産業用LED照明装置

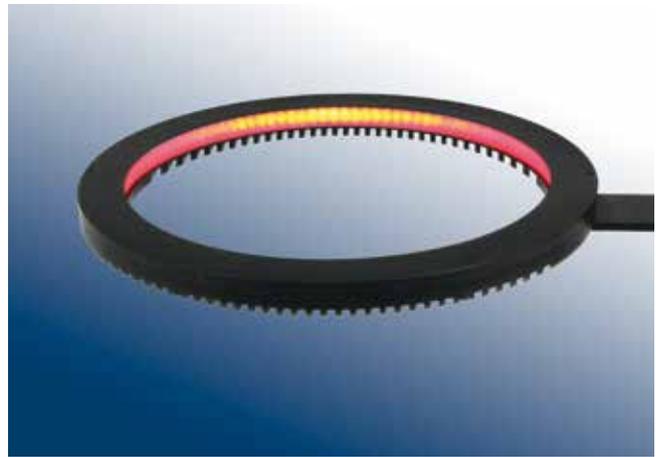

### ダークフィールド照明

Dark field lights are ideal for detecting edges and contours.

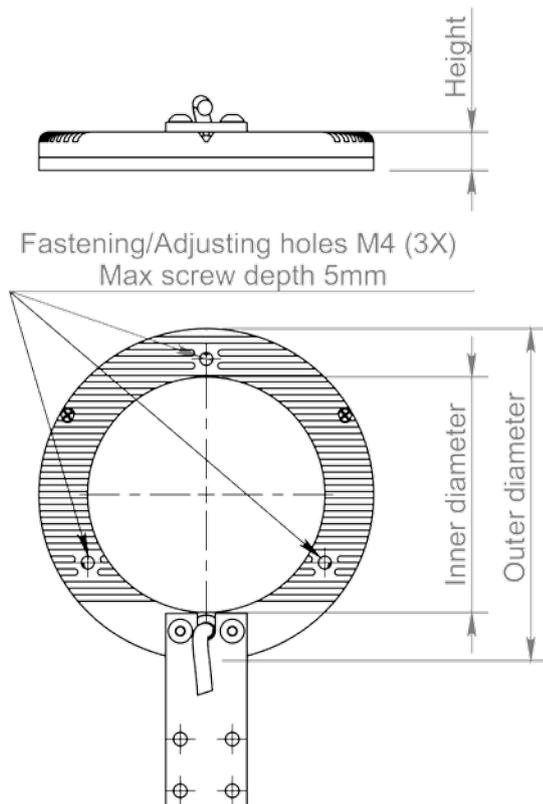

The standard light beam angle is 80°. Customized adjustment from 70° to 90° is possible.

The dark field lights have a diffuser for evenness of illumination.

Bracket LAD3 4011 is included (for details see „Lighting head brackets“).

### Mechanical dimensions

Step files available on request

### Options

- Cable length and type see "Order options"
- Custom light beam angle see "Order options"

## 産業用LED照明装置

### ドーム照明

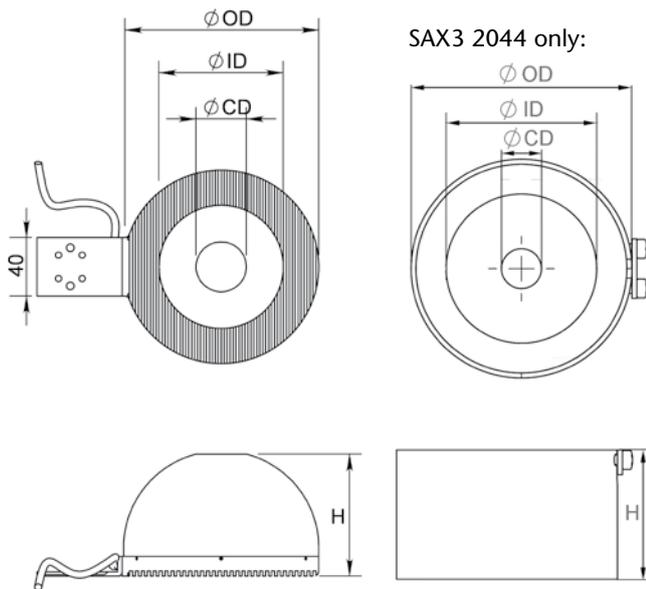

The dome lights are available in a wide range of sizes. Dome lights provide highly shadow-free lighting in small working distances and avoid reflection from reflective objects more than ring lights.

In order to prevent a camera hole shadow it is possible to use a coaxial light together with the dome light. As an option the camera hole can be covered by an adapter to reduce the hole size.

Brackets are included (no. SXX3 010213, for details see „Lighting head brackets“) except for SAX3 2044.

### Mechanical dimensions

### Options

- Cable length and type see "Order options"
- Adapter for reduction of camera hole size on request

# LATAB

## 産業用LED照明装置

### トンネル形照明

Tunnel lights, like dome lights, provide shadow-free lighting and are better at avoiding reflections from objects than are ring lights.

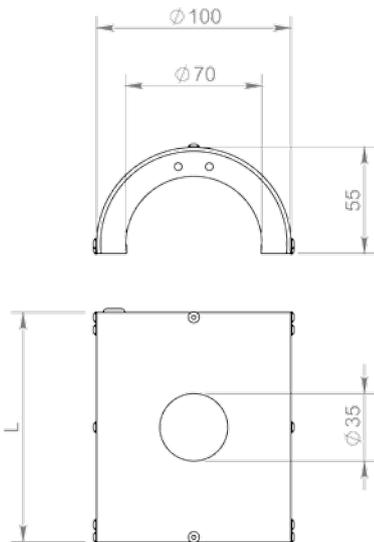

The most even illumination will be achieved by placing the light as close to the object as possible.

In order to prevent a camera hole shadow it is possible to use a coaxial light together with the tunnel light.

Optional brackets can be mounted at either end of the tunnel.

#### Mechanical dimensions

Step files available on request

#### Options

- Cable length and type see "Order options"
- Bracket options see "Lighting head brackets"
- Camera hole adapter to reduce camera hole size on request
- More camera holes on request

## 産業用LED照明装置

### フロント/バック照明

Due to its high intensive LEDs this light series can be used either as front light or as back light. For a front light application the diffuser is replaced by an acrylic clear glass cover.

Size options range from 51 x 48 to 207 x 516 mm.

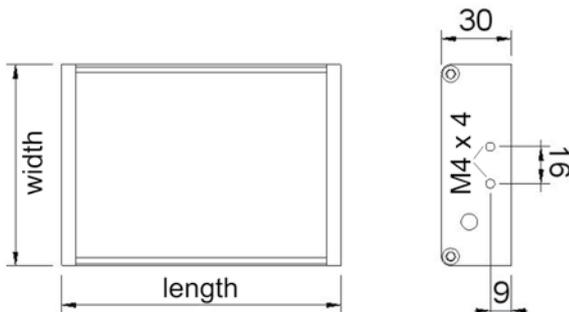

### Order information

(for red and IR lights, other light colors on request)

	Required controller:	1 A controller for continuous mode and 8 A controller for strobe mode, see "Controller selection"
	Required controller:	3 A controller for continuous mode and 24 A controller for strobe mode, see "Controller selection"
	Required controller:	Two 3 A controllers for continuous mode and two 24 A controllers for strobe mode, see "Controller selection"

### Mechanical dimensions

Step files available on request.

The table above states length (columns) and width (rows) of the outer dimension. The effective light area is reduced by 12 mm in length and 7 mm in width.

### Color information

Replace "X" in order number by one character <sup>1)</sup>	Color	Wavelength
H	Red	617 nm
W	White	
R	IR	880 nm
B	Blue	465 nm
G	Green	520 nm
U	UV	395 nm

<sup>1)</sup> Example for red back light: SAH7 0602

### Options

- Cable length and type see "Order options"
- Bracket options see "Lighting head brackets"
- For front light applications add "C" (acrylic clear glass cover) to order code, i.e. SAH7 0602C

# LATAB

## 産業用LED照明装置

### フロント照明 : 80mm x 56mm

This front light series with its multifunctional dimensions suits most applications.

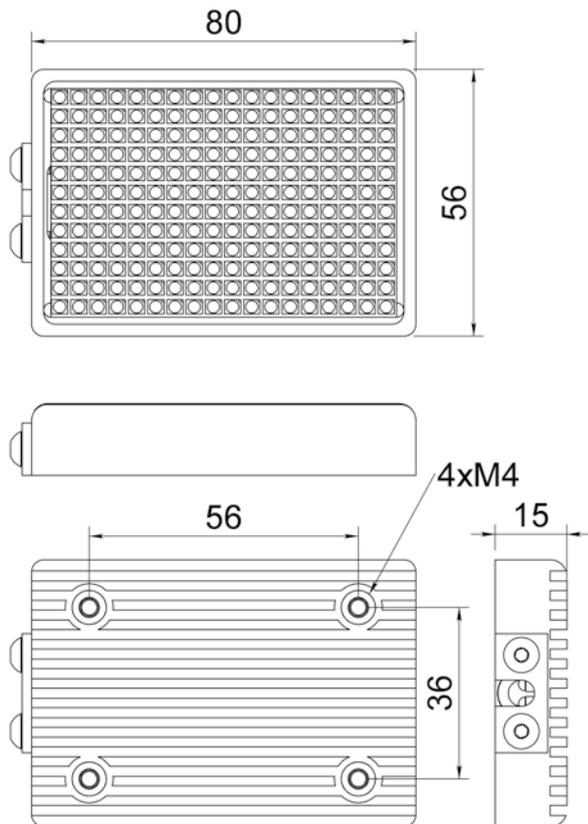

A diffuser for evenness of illumination is available as an option.

The effective light area is 72 x 48 mm.

Four M4 screws serve for securing the lighting head or a bracket (SXX3 010213).

### Mechanical dimensions

Step files available on request

### Order information

Order number	Color	Controller <sup>1)</sup>	
		steady mode	strobe mode

## 産業用LED照明装置

### スポット照明

#### SAX-spot light with 7 mm diameter

The small spot light is based on one S-LED. It is designed especially for lighting small areas.  
Option: Multi-light head applications are available with up to 10 spots using one controller.

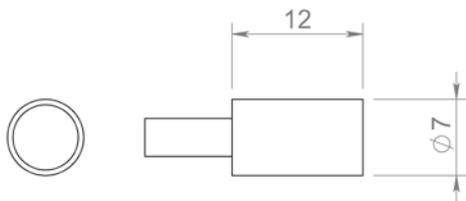

#### OSX-spot light with 16 mm diameter

The small spot light contains four high-power O-LEDs. It is designed especially for lighting small areas.  
Option: Multi-light head applications are available with up to four spots using one controller.

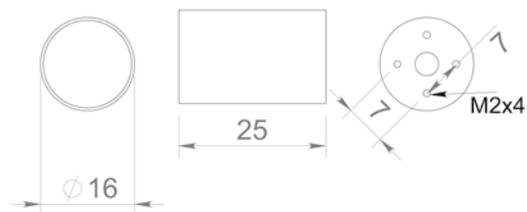

#### Mechanical dimensions SAX-spot light

## 産業用LED照明装置

### 超高輝度リング照明

These ring lights are equipped with 12 high-power LEDs permitting working distances of 1 to 1.5 m in practice, much more than standard LED lights which are usually suitable for working distances of up to 30 cm.

The lighting head can be equipped with lenses for light beam angles of 10, 18, 28 and 40 degrees for an ideal adjustment to different working distances and fields of views.

A bracket and a clear glass diffuser is included. It's possible to choose a shower glass diffuser.

## 産業用LED照明装置

## コントロールユニット

### General information

Reliable controllers are a precondition for efficient LED lighting. That's why LATAB has developed an extensive range of its own controllers. These not only maximize the life time of the sensitive LEDs, but automatically adapt to the connected light head.

The product features of the LATAB controllers are numerous: designs suitable for industrial use, adjustable light intensity, up to 4 channels, PC operation via Ethernet or other interfaces, as well as stand-alone solutions, either for continuous mode operation or strobe mode, with adjustable pulse durations from 50  $\mu$ s to 1.5 ms.

The controllers are based on constant current generators with a "plug and play" feature that automatically adapts to the connected LED light for exact light intensity.

The major differentiating factor of LATAB controllers is the illumination technique:

### Continuous mode

The adjustable parameter for continuous mode controllers is light intensity.

Continuous mode controllers are equipped with the "long flash" feature: The long flash function is a kind of trigger-controlled light. Light starts with trigger pulse and lasts as long as the trigger pulse is on.

In the long flash mode double intensity is available, that means that light intensity is twice the standard intensity. In double intensity (DI) mode ON-time is limited to five seconds, followed automatically by five seconds OFF-time. Shorter ON-time double intensity pulses are not limited and can be repeated at users demand.

Rise time is about 1.5 msec and fall time about 10 to 15 msec.

### Strobe mode

The adjustable parameters for strobe controllers are light intensity and strobe pulse length.

For PC-controlled units also a trigger pulse delay is available.

Strobe controllers provide 5 times more intensity compared to continuous devices.

In strobe mode the pulse length is tuneable by internal set time from 50 to 1500  $\mu$ sec.

Rise and fall time is a few  $\mu$ sec.

A second differentiating factor of LATAB controllers is the interface:

### Ethernet interface

These controllers communicate by Ethernet protocol. In principle this allows an unlimited number of units to be connected to the same computer. When using the test program the number is limited to 8 controllers.

The trigger signal is connected to the controller by a separate connector.

### RS-232 interface

The RS-232 interface is converted (within the COM-port connector itself) to RS-485, enabling up to 16 units to be connected to the same COM-port in a so-called multi drop system. These units are delivered with a test/demo PC-software which can also be used in real applications.

### Stand alone operation

In the stand alone mode the controller operates without an external computer. Light is adjusted by either an internal or an external potentiometer. Intensity can also be modulated by the voltage from zero (0 V) to full brightness (10 V).

### Test program

The PC-control unit is delivered with a test program for testing purposes and lab applications.

The protocol has a simple form and is therefore easily programmable by the user.

## 産業用LED照明装置

### 連続コントロールモード

The continuous mode controllers are microprocessor-based and specially designed to control all types of LATAB lighting heads. Like the lighting heads, they come in a black aluminium housing.

The controller is enabled for plug and play. Just connect the LATAB lighting head and the controller automatically identifies the lighting type by an electronic sensor and gives the maximum light intensity to the lighting head.

The light intensity can be adjusted by a dimmer inside the controller.

The unique "long flash" feature gives the opportunity to increase the light intensity up to 200% when a trigger pulse is received. In order to avoid overheating the pulse length is limited to 5 sec, followed by a 5 sec cool down period.

The controllers are supplied with a 5 m power/trigger cable <sup>1)</sup>.

#### General specifications

Supply voltage	24 V DC $\pm$ 10 %, max. 2.5 A
Power output	max. 1 A/3 A
Light intensity	0 - 100 % internal potentiometer
Trigger input	5 - 24 V, optically isolated
Operation temperature	0 - 65 °C

Sample picture. Specific type pictures and drawings on the following pages.

#### Order information

## 産業用LED照明装置

### ストロボコントロール モード

The strobe mode controllers are microprocessor-based and specially designed to control all types of LATAB lighting heads. Like the lighting heads, they come in a black aluminium housing.

The controller is enabled for plug and play. Just connect the LATAB lighting head and the controller automatically identifies the lighting type by an electronic sensor and gives the maximum light intensity to the lighting head.

The strobe pulse is adjustable in 16 steps. The light intensity can also be adjusted. Increasing the light intensity up to 200% at 50 and 100 µsec strobes can be selected by internal jumper.

The controllers are supplied with a 5 m power/trigger cable.

#### General specifications

Supply voltage	24 V DC ± 10%, max. 2.5 A
Power output	max. 8 A/24 A
Light intensity	0 - 100% internal potentiometer
Strobe pulse	50 - 1500 µsec in 16 steps
Trigger input	5 - 24 V, optically isolated
Trigger frequency	max. 200 Hz
Operation temperature	0 - 65 °C

Sample picture. Specific type pictures and drawings on the following pages.

#### Order information

Order number	Intensity control mode	Output	Number of channels	Figure number	Trigger delay (0 - 48 msec)

### コントロールデモキット/ 実験テスター

### インラインコントロール

The Demo controller/lab tester comes with plug & play functionality. All adjustments can be made from the front panel. It can be operated in both continuous (normal as well as external on/off control) and strobe mode (internal or external trigger).

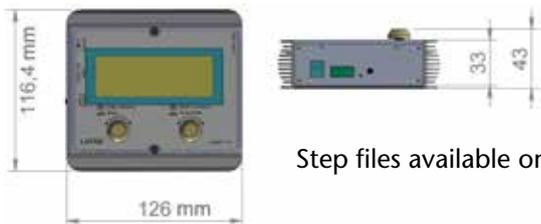

Trigger frequency: adjustable internal generator from 1 - 50 Hz or external up to 200 Hz.

Light intensity range:

0 - 100% @ strobe time 0.005 - 1.5 msec

0 - 200% @ strobe time max 100 µsec.

#### Mechanical dimensions

Step files available on request

#### General specifications

Supply voltage	24 V DC $\pm$ 5%, max. 2.5 A
Continuous mode	Adjustable brightness, max. 3 A, fine adjustment by control knob 0 - 100%
Strobe mode	Adjustable brightness, max. 24 A, strobe time from 0.005 - 1.5 msec, trigger frequency 0 - 200 Hz
Operation temp.	0 - 65 °C

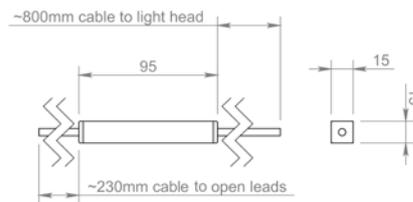

#### Order number

PAD8 1112

For applications not requiring the features of the PAD1 and PAD2 controllers, the 24 V DC option is available. An inline controller housed in a small aluminium tube as part of the light head cable enables the light head to be directly connected to the 24 V DC power supply.

This option allows only continuous mode at 100% light intensity and is available for light heads specified for 1 A max.

## 産業用LED照明装置

### オーダーオプション

#### Cable options for lighting heads

LATAB lighting heads are supplied with a 1 m cable by default.

For different lengths and types of cables please select the order code extension from the table below.

#### Extension cables for lighting heads

Extension cables between lighting head connector and controller are available for continuous and strobe mode controllers. Please select the cable length and type from the table below.

#### Diffuser

For a particularly homogeneous lighting there are diffusers available for the line light families and the front light 80 x 56 mm.

Ring lights and back lights have a diffuser included as standard.

#### Polarization filters

For ring lights with 78 and 102 mm diameter there are polarization filters available. For details please see page 35.

#### Custom light beam angle

For dark field and ring lights the light beam angle can be adapted to customer needs. See also page 5.

#### Lighting head brackets

There are different brackets available. For details please see page 34.

#### DIN clips for controllers

For a controller mounting on DIN rails there are DIN clips available for all control units. Two clips are mounted on the controller back side. For assembling just push the controller with the clips on the rail. Please select the option from the table below.

### Order information

Order option	Specified	Order code	Example
Cable options for lighting heads	different lengths	add "/XX" behind light head order number	SAH3 1078/5 for 5 m cable or SAH3 1078/05 for 0.5 m cable
Cable options for lighting heads	various flexibility	add "/R" behind light head order number	SAH3 1078/R for flexible 1 m cable or SAH3 1078/R3 for flexible 3 m cable
Extension cables for lighting heads	for continuous mode controllers	LKP1 XXXX	LKP1 4000 for 4 m extension cable (continuous mode)
Extension cables for lighting heads	for strobe mode controllers	LKS1 XXXX	LKS1 4000 for 4 m extension cable (strobe mode)
Diffuser	for line lights and front light 80 x 56 mm	add "/S" behind light head order number	SAH4 1050/S
Polarization filter	see page 31		
Custom light beam angle for dark field lights	degrees of beam angle, 80° is standard, adjustable from 70° - 90°	add "/(XX)" behind light head order number	SAX3 4072/(85) for 85° light beam angle
Custom light beam angle for ring lights	degrees of beam angle, 12° is standard, adjustable from 0° - 40°	add "/(XX)" behind light head order number	SAH3 1078/(05) for 5° light beam angle
Lighting head brackets	see page 30		
DIN clips for controllers	two clips on back side	add "/D" behind controller order number	PAD1 1131/8/D

### ライティングブラケット

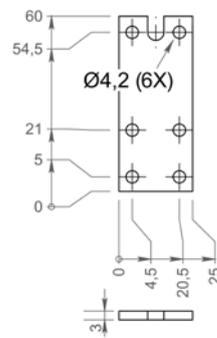

Alternative brackets with different dimensions are available to fit the LATAB lighting heads to special requirements. Step files are available on request.

### Mechanical dimensions

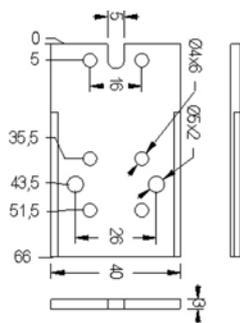

Universal, angle for S-series (SXX3 010213)

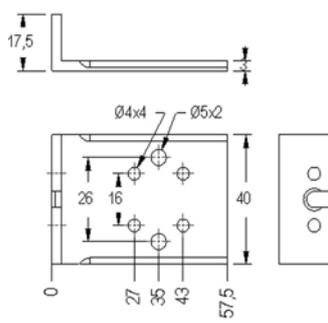

Universal, straight for S-series dark field (LAD3 4011)

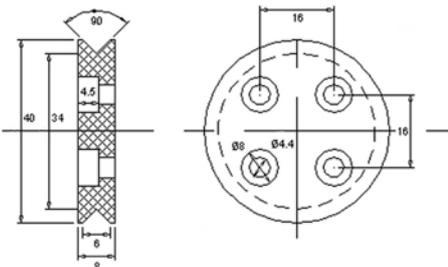

Universal, straight (LAD3 6114)

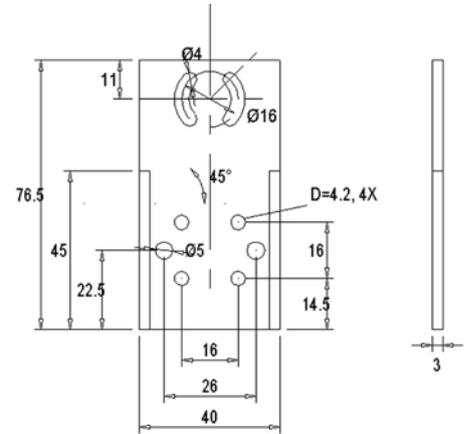

Universal, angle (LAD3 7217)

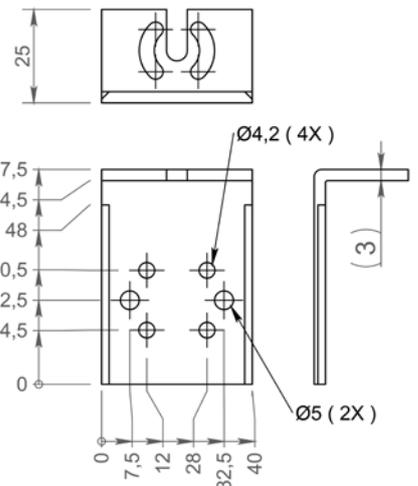

Round for Montech (LDF6 1011)

Adjustable, straight (LDF6 1023)

Adjustable, angle (LDF6 1022)

### Order information

Order number	Design
SXX3 010213	Universal, angle for S-series only
LAD3 4011	Universal, straight for dark field of S-series only
LAD2 6114	Universal, straight, for P-series and SXX4, SXX7, SXX9-series
LAD3 7217	Universal, angle, for P-series and SXX4, SXX7, SXX9-series
LDF6 1011	Round for Montech, for P-series and SXX4, SXX7, SXX9-series
LDF6 1023	Adjustable, straight, for P-series and SXX4, SXX7, SXX9-series
LDF6 1022	Adjustable, angle, for P-series and SXX4, SXX7, SXX9-series

Other types and custom designs on request.

## 産業用LED照明装置

### リング照明用偏光 フィルター

There are polarization filters for ring lights with 78 and 102 mm diameter available.

The filter consists of two parts: an outer part for the ring light and an inner part for the camera. The outer section is fixed by three screws. The inner section is twistable in order to adjust the polarization effect.

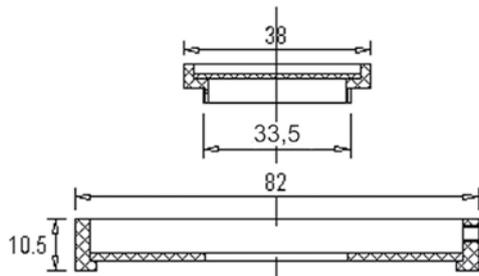

The most used polarization filter is HN38 with a total luminous transmittance of approximately 38% and it's noted for the lack of color distortion.

The filter ring is made of black aluminium.  
Other types of polarization filters on request.

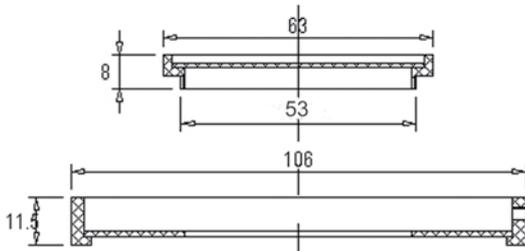

#### Mechanical dimensions

##### LFL3 1078

##### LFL3 1102

#### Order information

Order number	Design
LFL3 1078	polarization filter for SAX3 1078
LFL3 1102	polarization filter for SAX3 1102

Other types and custom designs on request.

## 産業用LED照明装置

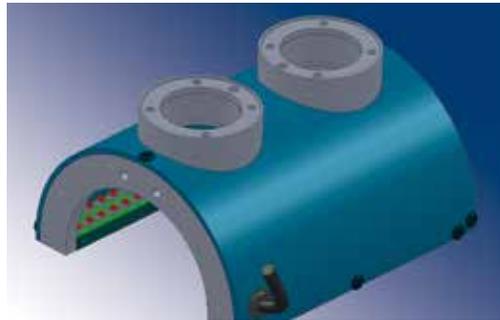

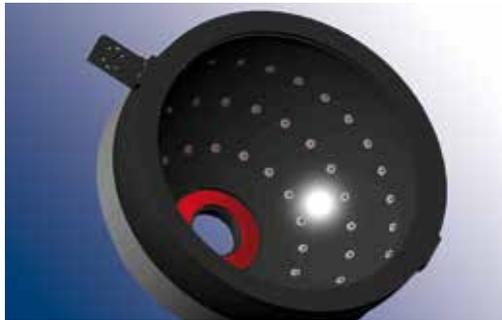

Customer-specific developments and adaptations are a core part of LATAB's business at near standard prices of course, and with short project lead times. You name it, we'll make it!

Design skills:

- CAD engineering
- Electronics development
- Thermal management

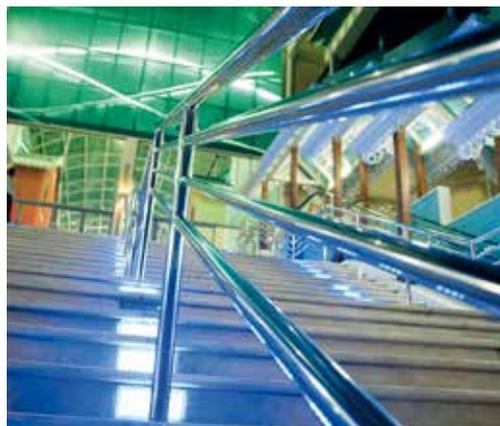

Customer-specific circular back light with 3 camera holes

In addition to LED lighting for the machine vision market, LATAB also offers general lighting solutions.

Examples include decorative lighting and object illumination, both indoors and out, using light modules based on high brightness or ultra-bright LEDs. LATAB's extensive experience in meeting the requirements of industrial applications paired with many years of design skills are the key to its successful LED engineering.
