LATAB

産業用LED照明装置

スポット照明

SAX-spot light with 7 mm diameter

The small spot light is based on one S-LED. It is designed especially for lighting small areas.
Option: Multi-light head applications are available with up to 10 spots using one controller.

Mechanical dimensions SAX-spot light

Step files available on request

Order information (for both types)

Order number	Sizes (mm)		Controller ¹⁾	
	outer Ø	height	steady mode	strobe mode
SAX3 7007	7	12	1 A	8 A
OSX3 7016	16	25	1 A	8 A

¹⁾ See controller selection for details

Options (for both types)

- Cable length and type see "Order options"

OSX-spot light with 16 mm diameter

The small spot light contains four high-power O-LEDs. It is designed especially for lighting small areas.
Option: Multi-light head applications are available with up to four spots using one controller.

Mechanical dimensions OSX-spot light

Step files available on request

Color information (for both types)

Replace "X" in order number by one character ²⁾	Color	Wavelength
H	Red	617 nm
W	White	
R ³⁾	IR	880 nm
B	Blue	465 nm
G	Green	520 nm

²⁾ Example for red spot light: SAH3 7007

³⁾ Only for SAX3 7007

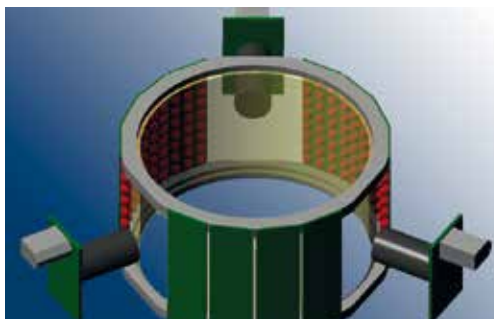

LATAB

産業用LED照明装置

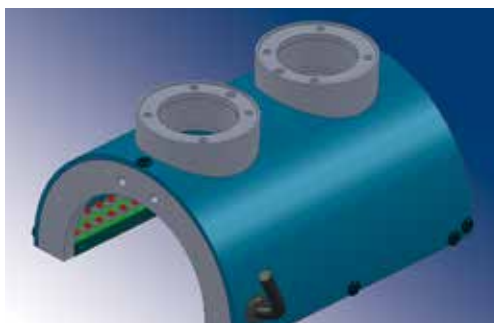

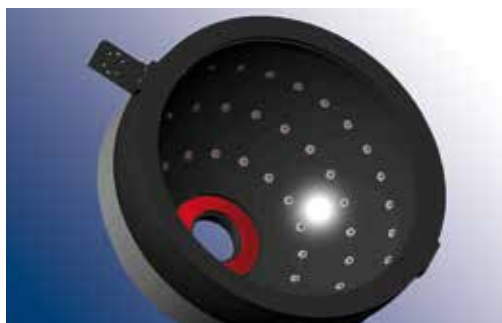

Customer-specific developments and adaptations are a core part of LATAB's business at near standard prices of course, and with short project lead times. You name it, we'll make it!

Design skills:

- CAD engineering
- Electronics development
- Thermal management

Customer-specific circular back light with 3 camera holes

In addition to LED lighting for the machine vision market, LATAB also offers general lighting solutions.

Examples include decorative lighting and object illumination, both indoors and out, using light modules based on high brightness or ultra-bright LEDs. LATAB's extensive experience in meeting the requirements of industrial applications paired with many years of design skills are the key to its successful LED engineering.
