LATAB

産業用LED照明装置

トンネル形照明

Tunnel lights, like dome lights, provide shadow-free lighting and are better at avoiding reflections from objects than are ring lights.

The most even illumination will be achieved by placing the light as close to the object as possible.

In order to prevent a camera hole shadow it is possible to use a coaxial light together with the tunnel light.

Optional brackets can be mounted at either end of the tunnel.

LATAB

産業用LED照明装置

Customer-specific developments and adaptations are a core part of LATAB's business at near standard prices of course, and with short project lead times. You name it, we'll make it!

Design skills:

- CAD engineering
- Electronics development
- Thermal management

Customer-specific circular back light with 3 camera holes

In addition to LED lighting for the machine vision market, LATAB also offers general lighting solutions.

Examples include decorative lighting and object illumination, both indoors and out, using light modules based on high brightness or ultra-bright LEDs. LATAB's extensive experience in meeting the requirements of industrial applications paired with many years of design skills are the key to its successful LED engineering.
